

DRIVER PLATFORM

SIDE-MOUNTED DRIVER PLATFORM EXTENSION WITH STEEL GRATING

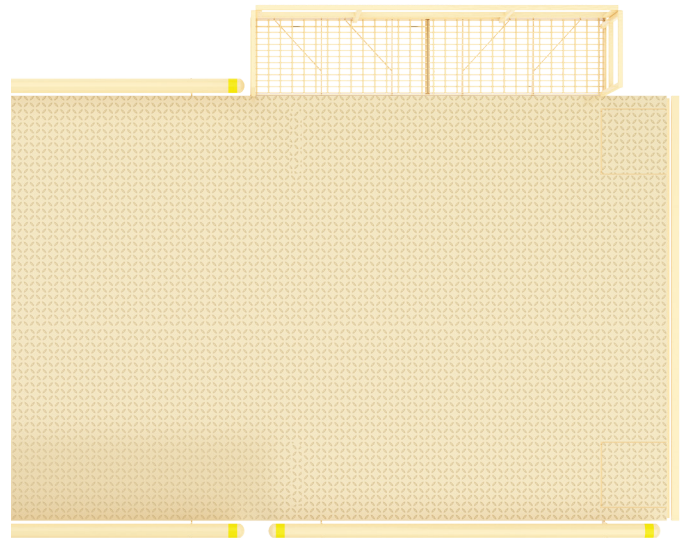

Cardinal Scale's Driver Platform extends the width of the weighing platform allowing the driver more room to get in and out of their truck.

Cardinal Scale's Driver Platform may be added to either end individually or both ends (sold separately).

- Enhances driver safety by extending the width of the weighing platform, making maneuverability easier.
- Features waist-high railings for added driver protection, reducing the risk of injuries.
- Securely bolts directly onto the ARMOR® steel deck truck scale's guide rail brackets.
- 10 ft long x 4 ft high (from top of platform).
- Recommended for simultaneous purchase with the truck scale (additional guide rail brackets required).
- Can be added to either end individually or both (sold separately).
- Crafted from powder-coated steel, matching the ARMOR® weighbridge (custom colors available).
- Optionally, it can be replaced with standard guide rails when needed.
- Steel grating prevents water accumulation, protecting against rust and reducing slip hazards.
- Grating and handrails are removeable, allowing for easier installation and repairs.

Cardinal Scale's driver platform is designed for user-friendly installation on either the left or right side of the truck scale. Moreover, it offers flexibility by allowing users to swap it out for any 7, 9, or 11-foot Cardinal guide rails. For pricing inquiries, please reach out to Cardinal Customer Service at (800) 441-4237 or cardinal@cardet.com.

Compliance Assurance

Helps businesses adhere to safety standards, minimizing potential liabilities and ensuring a secure working environment for drivers and operators.

Modular Design

Offers adaptability to suit specific scale configurations and can be easily customized to meet unique operational needs.

Robust Construction

Built from sturdy steel that is weatherproof, powder-coat painted, ensuring long-lasting performance and resistance to wear and tear.
