Mettler Toledo™ PDX and MTX PowerCell® Retrofit Kits

SMARTCELL® DC DIGITAL LOAD CELLS

Model DC-50K-MTX-8

SMARTCELL
DIGITAL LOAD CELLS

- Conversion kits for PDX and MTX load cells
- No power to the scale is necessary
- iSite Cloud-based remote monitoring convenience
- No junction box required
- Stainless steel IP69K load cell protection rating

SMARTCELL[®] DIGITAL LOAD CELLS

Pure Digital Solution with DC Load Cells and iSite Remote Monitoring

- Anti-rotation system with top and bottom cups
- Interchangeable with Mettler Toledo™ PowerCell® digital load cells
- Both PDX and MTX conversion kits available (see models on back page)
- Rugged enclosure for protection from the elements
- Stainless steel, environmentally-sealed load cells for years of trouble-free service
- Heavy-duty compression load cells with self-centering column
- OIML and NTEP certified for international use
- Hermetically-welded, protection class IP69K load cells
- High-capacity vehicle weighing

THERE IS NO JUNCTION BOX AND NO POWER AT THE SCALE NEEDED!

DIGITAL LOAD CELL CABLES INCLUDED

Plug-and-play digital load cell interconnect cables are included in the kits. They feature internal metal sheathing for rodent protection. The quick-connect cables form a watertight seal quickly and easily.

LONG-LASTING CONSTRUCTION

The top and bottom cups are CNC machined and precipitation hardened to a minimum of 40 Rockwell C to allow the integration of DC load cells into a scale that originally used a MTX or PDX load cell. These stainless steel cups maintain the effectiveness of Cardinal Scale's anti-rotation mechanism while working with the MTX or PDX mounting arrangements.

- Extra-robust upper and lower cups for optimal weighbridge support and stability
- Durable stainless steel construction that is built to last
- Machined precision and precipitation hardened

CONVERTS EXISTING METTLER TOLEDO™ POWERCELL® SCALES TO SMARTCELL® DIGITAL LOAD CELLS WITH CLOUD-BASED ISITE MONITORING

The Cloud-based iSite remote monitoring software comes standard with all Smartcan-enabled scales and offers e-mail and/or text alerts to authorized Cardinal Scale dealers, ensuring your scale is performing at all times during peak operations.

Cardinal Scale's 225D Navigator weight indicator provides truck ID numbers and truck tares, plus diagnostic readouts onscreen for individual load cells connected to SmartCan.

Cardinal Scale's patented software algorithm called SmartCal® allows a single technician to calibrate a scale by placing a test weight over each

**ONE STEP –

TRIM IN ONE PASS**

load cell only once. You simply move the test weight over a load cell, press a key, then repeat for the remaining load cells and you've calibrated the scale.

• W COMPLETE KIT INCLUDES:

- 4, 6, 8, 10, or 12 DC digital load cells
- 15 ft and 27 ft bundles of load cell interconnect cables
- iSite remote monitoring Cloud-based software

- Load cell end terminator
- Homerun cable terminator
- Top and bottom cups
