Height, Weight, and BMI Without Touching Any Keys

- Patient and provider can be up to 5 feet apart while the weighing process takes place
- No buttons to touch: Height, Weight and BMI are displayed at one time
- Full EMR connectivity via Bluetooth or Wi-Fi
- Audible beep after 2 seconds to indicate all readings have been received, letting the patient know it's time to step off
- Display will continue to read Height, Weight, and BMI up to 10 seconds, allowing provider time to enter data
